## Profile

---

Software Engineer with a proven track record of designing and operating scalable full-stack systems and AI-driven solutions. Expert in TypeScript, Go, Python, and SQL. Strong focus on reliability, performance, and automation delivering production ready products for SaaS, logistics, and agentic workflows through containerization, and modern cloud infrastructure.

## Education

---

### Bachelor of Computer Applicaton (BCA)

Apr 2021 – Jun 2025 | Lalitpur, Nepal

Nepal College of Information Technology

## Professional Experience

---

### Software Engineer

Aug 2024 – Present | Lalitpur, Nepal

PortPro [🔗](#)

- Developed complex EDI solutions handling broker tenders, including the highest revenue-generating features in the product.
- Built an EDI mapping agent that transforms complex EDI formats into PortPro's standard JSON schema using Next.js, Vercel AI SDK, pgvector, and a Monaco-based editor.
- Built and published the VS Code extension 'where-is' [🔗](#) to help 150+ developers navigate legacy codebases. [github](#) [🔗](#)
- Involved in designing and shipping multiple agents that automate billing, tender workflows, and document validation.
- Contributed to a rate engine capable of handling complex, dynamic rate calculations.
- Worked on an Appointment System to streamline scheduling and operational coordination.
- Recognized as Employee of the Month within six months of joining.

### Full Stack Developer

Jun 2022 – Aug 2024 | Lalitpur, Nepal

Dallotech [🔗](#)

- Built full-stack portfolio websites and web applications for clients from concept to deployment.
- Developed interactive user interfaces and integrated complex functionality using Next.js, Tailwind CSS, Ant Design, NestJS, and TypeORM.
- Collaborated with cross-functional teams to design and implement scalable architectural patterns.
- Led development efforts on various government projects, ensuring compliance and quality standards.
- Mentored junior developers and contributed to technical decision-making processes.

## Skills

---

### Languages

TypeScript, Go, Python, SQL

### Agentic Development

Langchain, Vercel AI SDK, Google AI SDK, pgvector

### Frameworks & Runtimes

Next.js, TanStack Start, NestJS, Gin, FastAPI

### Databases & Storages

PostgreSQL, MySQL, MongoDB, Redis, Supabase

### Message Queues

RabbitMQ, Redis Pub/Sub

### DevOps & Containerization

Docker, Docker Compose

### Testing & Monitoring

New Relic, Cloudwatch, Jest, Playwright

### Cloud Platforms

Vercel, Railway, Netlify

### Development Tools

Git, Linux

### Logical Thinking

Data Structures & Algorithms, System Design

## Hobby Projects

---

### sagarmathalabs [↗](#)

*Tanstack Start • Shadcn/UI • Langchain • Supabase*

A knowledge-base reactive agent that pairs Notebook-style RAG search with AI-generated dashboards so teams can interrogate their documents and spin up interactive visuals without writing code.

### BlogSansar [↗](#)

*NextJS • Shadcn/UI • tRPC • Supabase • TypeScript*

A full-stack blogging platform where users can write, publish, and share articles with a clean, modern interface built on Next.js and tRPC.

### Student Shop [↗](#)

*NextJS • AntDesign • Go • MySQL*

A full-stack e-commerce platform built with Next.js that connects students with exclusive discounts and deals, featuring a comprehensive admin dashboard for managing products, orders, promotions, user verification, and content configuration.

### expennse [↗](#)

*Expo • React Native • Appwrite • TypeScript*

expennse is a mobile application build with expo and react native that allows user to track their expenses with attractive visualization charts.
